We're Hiring!

Role: QA Lead – Cybersecurity Technology & Engineering

Location: Pune / Hyderabad

Experience: 6+ Years

Work Mode: Full-Time / Hybrid

Join our Cybersecurity Technology & Engineering team and play a pivotal role in building and leading a Professional Testing Practice. As a QA Lead, you will define the testing strategy, implement best practices, and drive continuous improvement across Cybersecurity projects to enhance quality, compliance, and efficiency.

What You'll Do:

- Establish and lead Cyber's Professional Testing Practice, driving adoption and standardization of testing processes
- Define and deliver Testing Strategy, frameworks, methodologies, and tools across Cybersecurity teams
- Promote and implement automated testing practices and guide teams on performance & stress testing levels
- Manage QA engineers, provide mentorship, and ensure control compliance across projects
- Identify and mitigate risks/issues in testing, track defects through resolution, and maintain audit-ready evidence
- Develop metrics, dashboards, KPIs, and OKRs to measure quality improvements and process efficiency
- Build a Cyber QA Community of Practice and align with other business lines to implement best practices

What You Bring:

- Proven experience delivering Testing Strategies & governance frameworks across multiple regions
- 6+ years in QA, including 2+ years in a QA Manager/QA Lead role
- Strong stakeholder management & ability to influence cross-functional teams
- Familiarity with Agile & DevSecOps processes and tools (JIRA, Confluence, GIT)
- Strong analytical, communication, and documentation skills

- Experience leading workshops, mentoring teams, and driving continuous improvement initiatives

#### Why Join Us:

Be part of Cybersecurity function, working on critical projects that protect millions of customers worldwide. Gain exposure to cutting-edge technology, leadership opportunities, and a collaborative environment that values innovation and continuous learning.

#### Interested

Send your Resume to : [akhilajakkula1990@gmail.com](mailto:akhilajakkula1990@gmail.com)

We are hiring!

Position: Testing Engineer Lithium Battery Validation & Testing, BMS Testing  
Applications: 2W ,3W Lithium Batteries, EV, Inverter Batteries, Energy Storage Systems (ESS)

Position: Senior Test Engineer

Location: Pune (Looking for only Pune candidates)

Experience Level: 5 + Years

Salary upto-10 LPA

Job Scope: Test Engineer (EV- Battery Testing & Validation) role will encompass designing, executing, and reporting tests to fulfil design validation requirements for Battery systems and components (Battery, Charger, BMS) as per the Design Validation Plan (DVP) and communicate the findings to the relevant stakeholders. The individual will also be responsible for managing the test factory.

Responsibilities:

Full responsibility for system and component level validation deliverables of Battery pack, BMS, Charger.

Responsible for developing comprehensive DVP test plans for functional, structural, performance, and environmental validation and test preparation.

Individuals should be knowledgeable about different test standards and homologation requirements as well as LV/HV testing.

Individuals will be responsible for lab requirements about the Battery/Charger testing.

Review and improve existing validation techniques, test methods, and processes with a focus on automation to avoid redundancy and achieve better throughput.

Individuals will coordinate internally/externally for the timely completion of the Battery pack, BMS, Charger.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

#### Education and Skills Requirements:

Bachelor's degree or higher in Electrical Engineering, or a related field.  
experience with battery testing as per the design validation plans  
and homologation requirements

- Good understanding of battery/charger operation and all the components involved
- Experience in using a bi-directional power supply, electronic load back, battery cycler, data loggers, AC variance, RCD, etc.
- Failure simulation and root cause analysis. Should be able to manage pack-level tests alone, efficiency test, SOC vs OCV, etc
- Strong engineering experience in charging communication standards & vehicle charging testing methodologies
- Hands-on experience in performing homologation tests as per the AIS 156 for battery/charger
- Knowledge of testing as per export homologation requirements is a plus.

## We're Hiring: RPA Developers (UiPath → Blue Prism Migration)

We are seeking talented RPA Developers with hands-on experience in Blue Prism and UiPath to support a large-scale migration project. This role involves converting automation processes built in UiPath into Blue Prism, ensuring optimized, scalable, and stable delivery.

Location: Mumbai & Bangalore

Experience: 2–8 years

### Key Responsibilities

Analyze existing UiPath workflows and assess feasibility for migration.  
Redesign, configure, and deploy automation solutions in Blue Prism.  
Migrate and optimize automation scripts, ensuring accuracy, performance, and compliance.  
Collaborate with business analysts and solution architects to align with business requirements.  
Conduct code reviews, unit and integration testing for migrated processes.  
Troubleshoot issues in automation and provide timely resolutions.  
Prepare technical documentation, migration logs, and handover materials.

### Required Technical Skills

UiPath: Strong understanding of workflows, Orchestrator, REFramework, queues, and scheduling.  
Blue Prism: Process Studio, Object Studio, Work Queues, Control Room, Surface Automation, credential/security management, and exception handling.  
Migration: Proven experience mapping UiPath activities to Blue Prism, handling compatibility gaps, and refactoring processes.  
Programming/Scripting: .NET (C#/VB), SQL, basic Python.  
Databases: SQL queries, stored procedures, and DB integration with bots.  
Version Control: Git, TFS, or SVN.  
Deployment & Support: Experience in production deployments and providing L2/L3 support.

### Desired Skills

Exposure to other RPA tools or migration projects.  
Knowledge of robotics operating models (ROM), PDDs, and SDDs.

Interested candidates can share their updated CV at [sreekantha.r@tsit.co.in](mailto:sreekantha.r@tsit.co.in)
