

Dubai - 🚀 We're Hiring: Software Testing Lead

We're looking for an experienced Quality Assurance Lead to head our QA team and drive high-quality software delivery. You'll define strategy, lead both manual & automated testing, mentor QA engineers, collaborate with cross-functional teams, and continuously improve our processes.

What You'll Do:

Own test strategy & methodologies: functional, regression, performance, security, UI, etc.

Lead test planning & execution; create and maintain test artifacts.

Manage QA engineers: task assignment, priority setting, performance mentoring.

Monitor defect lifecycle & root cause; work closely with dev team to resolve.

Define QA metrics (coverage, defect rates, resolution time).

Participate in release planning and risk assessment; ensure CI/CD integration.

What We're Looking For:

6+ years in QA / software testing, with leadership experience.

Hands-on with automation tools (Selenium, Cypress, etc.), and exposure to performance testing.

Familiar with test management tools (JIRA, TestRail, etc.) and CI/CD pipelines.

Strong scripting skills (Python / Java / JS), excellent communication & leadership.

Familiarity with Agile/Scrum environments.

email at fartashia.asim@cns-me.com

Senior QA Engineer (8+ Years Experience)

Location: Remote (Offshore)

Experience: 8+ Years in Software Testing

We are seeking a highly experienced QA professional with over 8 years of experience in software testing, ideally with exposure to Agiloft (preferred) or similar legal contract management platforms. The ideal candidate is proactive, detail-oriented, and capable of working independently within a fast-paced, agile environment.

Key Responsibilities:

1. Define and implement the overall testing strategy for new features and products.
2. Write detailed and comprehensive test cases, scripts, and test plans using X-ray.
3. Identify, document, and track bugs with clear and concise reports.
4. Collaborate closely with product managers and stakeholders in an Agile development process.
5. Perform risk analysis and make informed decisions on test execution and mitigation.
6. Continuously identify areas of improvement in QA processes and propose enhancements.
7. Develop deep product knowledge to ensure robust quality assurance coverage.

Preferred Qualifications:

8+ years of relevant experience in software testing.

Hands-on experience with Agiloft or other legal contract management tools.

Expertise in using X-ray or similar test management tools.

Strong knowledge of Agile methodologies and fast-paced development cycles.

Excellent verbal and written communication skills.

Strong analytical and problem-solving abilities.

=====

Job Title: QA Engineer (Web Platform – Drupal & Next.js)(freelancer/consultant)
Location: Remote
Experience: 5+

Key Responsibilities

- Own the QA process for the web platform across frontend (Next.js) and backend (Drupal APIs).
- Develop comprehensive test documentation including test plans, test cases, and test data for functional, integration, regression, and exploratory testing.
- Execute manual testing for web UI and APIs, logging clear, reproducible issues with detailed steps and environment information.
- Perform cross-browser and device compatibility testing to ensure responsiveness, accessibility (WCAG 2.1 AA), and consistent user experience.
- Validate GraphQL/REST API responses using tools like Postman or Insomnia, including schema validation and error handling.
- Test API integrations between Next.js frontend and Drupal backend, verifying data flow and content management workflows.
- Collaborate with developers, designers, and product owners to understand requirements, user stories, and edge cases.
- Participate in agile ceremonies (daily standups, sprint planning, backlog refinement, sprint demos).
- Work with development teams to reproduce bugs, support debugging efforts, and champion quality-first development practices.
- Provide QA input during requirement analysis and design phases to identify quality risks early.

Required Skills

- 5+ years of QA/testing experience in modern web application development.
- Strong proficiency in testing React/Next.js component-based UIs (state management, lifecycle testing).
- Extensive API testing experience with GraphQL and REST APIs (authentication, authorization, performance validation).
- Hands-on expertise with bug tracking (Jira, Asana) and test management tools (Zephyr, TestRail, qTest).
- Strong understanding of responsive design principles and cross-browser testing.
- Knowledge of accessibility compliance (WCAG 2.1 AA) and testing methodologies.
- Proficiency with Git version control and collaborative workflows.
- Experience with Agile/Scrum methodologies.
- Excellent written and verbal communication skills for documentation and stakeholder updates.
- Strong analytical and problem-solving abilities with attention to detail.
- Knowledge of web security testing (OWASP vulnerabilities, GDPR, CCPA compliance).

Engagement Model

- Participate in daily stand-ups with the remote team.
- Actively contribute to QA planning during sprint cycles.
- Collaborate closely with developers and product teams to ensure

high-quality releases.

Interested candidates can share their CV at amita.patiil@codevian.com

We're Hiring: Software Tester (Telecom Domain) – Remote

Are you passionate about software testing and eager to grow your career in the telecom industry? We're looking for a Software Tester to

join our team and contribute to delivering high-quality telecom solutions.

Experience Requirements:

1–3 years of experience in software testing (telecom industry preferred).
Basic understanding of telecom systems (CRM, Billing, Mediation, Charging, IN systems).
Familiarity with telecom service workflows (mobile prepaid/postpaid, fixed line, data, VAS, etc.).
Strong knowledge of SDLC and STLC.
Hands-on experience in manual testing (functional, regression, smoke, sanity, UAT support).
Experience with defect lifecycle management using JIRA or similar tools.
Advantageous: SQL for DB validation, API testing tools, mobile app testing.

Scope of Work:

Execute manual test cases for telecom applications.
Validate customer journeys across billing, charging, CRM, and provisioning flows.
Document results, report defects, and assist with regression testing.
Support test data preparation and subscriber account configuration.
Collaborate with senior testers to ensure proper coverage and compliance.
Maintain test repositories and assist automation teams when needed.

This is an excellent opportunity to work with telecom experts, gain domain knowledge, and grow in a collaborative environment.
If this sounds like you, we'd love to hear from you!

Apply now (devika.bajpai@litspark.solutions)

=====

We're Hiring | Junior Tester – Telecom Domain

Location: Pune (Remote)

Experience: 1–3 Years

Apply Now: hr.rasfoirne@gmail.com

| +91 9209649538

About the Role:

We are looking for an enthusiastic Junior Tester to join our QA team and support testing activities across telecom systems. This role is ideal for candidates who want to grow their testing career in the telecom domain while working on CRM, Billing, Charging, Mediation, and Provisioning systems.

Key Responsibilities:

Execute manual test cases for telecom-related applications.

Validate customer journeys across Billing, Charging, CRM, Provisioning flows.

Document execution results and report defects using tools like JIRA.

Assist in regression testing post-fixes and deployments.

Support senior testers in ensuring coverage and compliance with telecom standards.

Prepare test data and configure subscriber accounts.

Contribute to test case repository creation & maintenance.

Provide basic support to the automation team (test data prep, simple script execution).

Required Skills:

1–3 years in software testing (telecom experience preferred).

Understanding of CRM, Billing, Mediation, Charging, IN systems.

Familiarity with telecom workflows (prepaid, postpaid, fixed line, data, VAS).

Knowledge of SDLC & STLC.

Manual testing techniques (functional, regression, smoke, sanity, UAT support).

Tools: JIRA, Open Project.

Advantageous: Basic SQL, API testing tools, mobile app testing.

A great opportunity to kickstart your career in telecom testing and grow under the guidance of experienced professionals!

Job Title : Playwright Automation Tester

Location : Troy, MI (REMOTE)

Client : Technology Software Services

JD:

- Proven “hands-on” experience with test automation tools such as Playwright and/or Selenium.
- Design, develop, and maintain automation test scripts using Playwright for web, API, and mobile applications, with hands-on test script development.
- Proficiency in scripting languages: Java, JavaScript & Typescript.
- Hands-on experience in API testing using Postman, Rest-Assured.
- Experience in BDD/TDD methodologies like cucumber.
- Proficient in writing SQL queries for data validation.
- Excellent analytical and debugging skills.
- Familiarity with Azure solutions such as Entra-ID, Azure Function, Storage and Insight.
- Collaborate with cross-functional teams, including developers, QA engineers, and DevOps, to ensure high-quality software releases.
- Implement and manage the integration of automated tests into CI/CD pipelines using Jenkins/GitHub actions/Azure DevOps for automated test execution.
- Implement shift-left testing, ensuring early-stage automation coverage in the software development lifecycle.
- Mentor and guide junior/Manual QA engineers in test automation framework design, scripting, and maintenance.
- Stay updated with the latest automation tools, trends, and best practices.

We Are Hiring – QA & Test Lead

Location: Chennai / Remote

Position Type: Full-Time

About the Role

AstroCure is looking for an experienced QA & Test Lead with a strong background in both manual and automation testing. As part of a small and fast-moving team, you will be responsible for ensuring that all applications are thoroughly tested, reliable, and meet the highest standards of quality.

Key Responsibilities

Define, implement, and maintain test strategies, plans, and processes.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Perform comprehensive manual testing (functional, regression, integration, UAT).
Design, develop, and maintain automation test scripts using frameworks such as Selenium, Cypress, or Appium.
Identify, log, and track defects to closure.
Coordinate closely with developers and the team to deliver quality releases on time.
Mentor and guide QA engineers, ensuring timely and accurate execution of test plans.
Provide clear reporting on QA progress, metrics, and risks.

Required Skills & Qualifications

5+ years of experience in QA/testing, with at least 2 years in a lead role.
Proven expertise in manual testing methodologies.
Strong hands-on experience with automation frameworks (Selenium, Cypress, Appium, etc.).
Familiarity with test management and defect tracking tools (e.g., JIRA, TestRail).
Good understanding of SDLC, STLC, and Agile workflows.
Strong analytical, problem-solving, and communication skills.

Nice to Have

Experience in API testing (Postman, REST Assured).
Knowledge of CI/CD pipelines and test automation integration.
Exposure to performance/load testing tools (e.g., JMeter).

Why Join AstroCure

Lead QA initiatives in a growing, close-knit team.
Direct collaboration with developers and team members for impactful work.
Flexible work options (Chennai / Remote).

We're Hiring | Automation Testing Engineer

Location: Pune (Remote)

Experience: 3–6 Years

About the Role:

We are looking for a skilled Automation Testing Engineer with strong expertise in test automation and a background in telecom systems. The ideal candidate will play a key role in designing, developing, and executing automation frameworks to ensure quality across diverse telecom service flows.

Key Responsibilities:

Design, develop, and maintain automation frameworks (Web, API, Mobile).

Convert manual test cases into automated regression suites.

Integrate automation scripts with CI/CD pipelines for continuous testing.

Perform API testing using Postman, RestAssured, or SoapUI.

Validate end-to-end telecom service flows (Billing, Charging, Provisioning, Mediation, etc.).

Support performance/load testing using JMeter/LoadRunner.

Collaborate with QA teams and business analysts to ensure test coverage.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Mentor junior testers and contribute to overall QA capability building.

Required Skills:

Automation tools: Selenium WebDriver, TestNG, JUnit, Cucumber (BDD/TDD).

Programming/scripting in Java, Python, or C#.

API testing & automation (Postman, RestAssured, SoapUI).

Performance testing (JMeter, LoadRunner).

Knowledge of SDLC, STLC, Agile/Scrum.

CI/CD tools (Jenkins, GitLab CI, Bamboo), VCS (Git, SVN).

Telecom domain experience (CRM, Billing, Charging, IN, Mediation, Provisioning) is highly desirable.

If you are passionate about test automation and want to be part of a dynamic team driving quality in telecom solutions, we'd love to connect with you!

=====

We're Hiring! Senior QA / Telecom Test Lead – 5 Open Positions
Are you an experienced QA professional with deep expertise in telecom systems? Here's your chance to join a dynamic team and lead end-to-end testing across CRM, Billing, Charging, Mediation, Provisioning, and Interconnect systems!

Location: Pune (Remote)
Experience: 7+ years (4+ years in telecom domain)
CTC: ₹12 LPA

What you'll do:

- Lead testing across telecom projects: CRM, Billing, Charging, Mediation, Provisioning, and more
- Design test strategies, plans, and automation scripts for complex telecom services
- Validate billing accuracy, charging rules, and end-to-end flows
- Coordinate UAT with business teams and ensure quality alignment with telecom standards
- Mentor junior testers and drive automation for regression, sanity, and performance testing

What we're looking for:

- Strong experience in telecom domains (mobile, fixed line, broadband, digital services)
- Expertise in manual and automation testing (Selenium, Postman, JMeter, SOAP UI)
- SQL/database validation skills and API/integration testing experience
- Proven leadership and mentoring abilities
- Willingness to travel overseas, if required

If you thrive in complex telecom environments and love ensuring high-quality, seamless experiences, we want to hear from you!

shanker.rao@kk-talents.com / DM for details!
