Job Opportunity: Software Tester (Automation / Manual)

Location: Hyderabad, India

Company: Yonosys Technology Private Limited

Clients: US-based Clients

Package: ₹3.1 LPA – ₹3.6 LPA

process:5days

charges applicable : 2.5 lakhs Project duration : 5 years

About Us:

Yonosys Technology Private Limited is a fast-growing IT solutions company serving reputed US clients. We are committed to delivering high-quality software products and services. We are looking for detail-oriented and proactive Software Testers to join our talented team in Hyderabad.

Role:

We are hiring enthusiastic Software Test Engineers with expertise in Automation and/or Manual Testing.

Key Responsibilities:

- Develop and execute test cases, test plans, and test scripts for web-based applications.
- Perform manual and automated testing to identify bugs and ensure product quality.
- Work closely with developers to understand requirements and deliver robust solutions.
- Document and track defects, and coordinate with the development team for timely resolution.
- Participate in review meetings and provide constructive feedback.
- Continuously improve testing strategies and frameworks.

Required Skills:

- ✓ Strong knowledge of Manual Testing processes and methodologies.
- Hands-on experience with Automation Testing tools (e.g., Selenium, TestNG, JUnit) is a plus.
- ☑ Good understanding of SDLC and STLC.
- ✓ Familiarity with bug tracking tools like JIRA, Bugzilla, or similar.
- Excellent problem-solving and analytical skills.
- ✓ Strong communication and teamwork abilities.

Who Can Apply:

- B.Tech / B.E. / MCA graduates with relevant skills.
- Freshers and candidates with up to 1–2 years of experience in Testing (Manual / Automation) are encouraged to apply.

Perks:

- Opportunity to work on real-time projects for international clients.
- Learning and development opportunities in latest testing tools and practices.
- Friendly work culture and supportive team.

==============

We have uregent opening with one of our client. Below is the JD.

QA Manual Engineer

Location: Bangalore, Chennai, Hyderabad

Shift: UK shift 4 to 5 years exp

Onsite / hybrid / remote as per project norms

Key Responsibilities:

Review and analyse requirements, functional specifications, and design documents to ensure full understanding of test needs.

Write detailed test plans, test cases, and test scenarios covering functional, integration, system, end-to-end testing.

Execute manual test cases: functional, regression, user-acceptance tests (UAT).

Perform defect logging, tracking, and verifying fixes, collaborating with development teams.

Validate API behavior manually (where automation not present), check request/response, payload, error codes etc.

Work with test data setup, environment preparation as needed.

Participate in test case / test plan reviews to ensure good coverage, correctness.

Interact with business / stakeholders / product owners for clarifications, walk through user stories.

Document test results, produce reports, track metrics (e.g., defects found, test progress).

Escalate quality issues proactively; propose improvements in processes.

Participate in Sprint planning / daily stand-ups / retrospective / review meetings (if Agile/Scrum).

Required Skills & Experience

Overall 4-5 years experience in Manual QA / software testing.

Strong knowledge of the Software Testing Life Cycle (STLC).

Good experience with test planning, writing test cases, executing functional and regression tests.

Familiarity with defect tracking tools (e.g. JIRA) and test management tools (Zephyr, Xray,

etc.)

Basic understanding of APIs (REST) for manual validation.

Good communication skills - to document issues clearly, interact with cross-functional teams.

Ability to understand technical requirements and translate into test cases.

Domain knowledge: Telecom / OSS/BSS / Salesforce / Billing etc might be preferred.

Desirable/Bonus Skills

Exposure to UI testing tools (even if manual) and basic understanding of automation (helps collaboration with automation testers).

Basic SQL skills for data validation.

Understanding of Agile / Scrum processes.

Experience with test data generation / environment setup.

Familiarity with CI/CD, or at least build / release process involvement.

Salesforce testing experience may be a plus if relevant.

Educational Qualifications

Bachelor's degree in Computer Science, Information Technology, or related field (or equivalent experience).

UFT AUTOMATION TESTING

Location: Bangalore, Hyderabad, Chennai

Exp: 4+ YEARS

Intrested candidates can apply here https://lnkd.in/eTDtXdKW or else send updated cv's in Mailbox pavan.nadiminti@codersbrain.com

Sonu Gupta Kajori Dey Mohammed Yaseen Jagriti Kumari Riya Jain

Job description

The UFT AUTOMATION TESTING will be responsible for designing, developing, and maintaining automated testing scripts and conducting functional testing of SAP modules and other enterprise applications. This role will enhance the quality of the products delivered by ensuring thorough testing according to specified business requirements. Responsibilities

Design, develop, and maintain UFT automation scripts for SAP and other enterprise applications.

Perform functional testing of SAP modules (e.g., MM, SD, FI, HR) based on business requirements.

Collaborate with business analysts and developers to understand requirements and translate them into test cases.

Execute manual and automated test cases, log defects, and track them to closure.

Participate in test planning, test execution, and defect triage meetings.

Ensure test coverage and traceability for all functional requirements.

Work closely with cross-functional teams to support end-to-end testing and User Acceptance Testing (UAT).

Maintain test documentation and contribute to test process improvements.

Qualifications

Strong experience in UFT/QTP automation scripting and framework development. Good understanding of SAP Applications and hands-on experience in SAP GUI testing. Proficiency in VBScript for UFT scripting.

Experience with Application Lifecycle Management (ALM)/Quality Center or similar test management tools.

Solid knowledge of the Software Testing Life Cycle (STLC) and defect management.

Ability to analyze business requirements and create detailed test scenarios and cases.

Relevant educational qualifications in computer science or related fields.

Preferred Skills

Familiarity with additional automation testing tools and methodologies.

Knowledge of Agile testing practices.

Certification in software testing (e.g., ISTQB).

Experience

Proven experience in software testing, particularly with automation and SAP, though the specific years of experience required are not specified.
